

# DER MOTIONCOMPOSER

Discover new worlds with the blink of an eye!

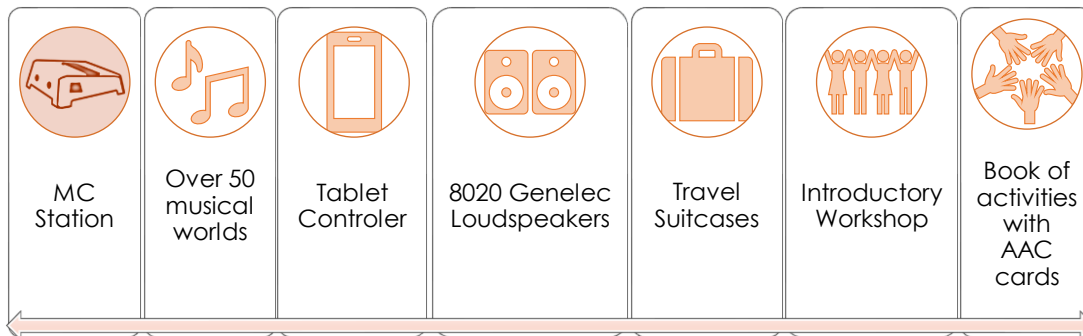

Using a 3D camera, this high-tech interactive device turns your movements into music.

Make birds chirp with just the blink of an eye? Make piano notes sound with a movement of your arm?

The MotionComposer 3 is a pioneering accomplishment in technology for creative expression in persons with different abilities. It is ideally suited for those interested in exploring new methods in therapeutic or educational practice, and for institutions wanting to expand their creative offer to all abilities.

## The MotionComposer includes:

13.850€ (before VAT) with 3-year warranty, technical support and software-updates.

# DER MOTIONCOMPOSER

## In practice

- Tablet Interface
- Over 50 sound worlds, from classical instruments to nature and animal sounds
- 5 modes of play, 1, 2 players and groups
- Accessible for all
- Gestures using different body parts

When I move, I make music!

**Sharing experiences.** Music touches everyone, even if the connections between one's own movements and the sounds they produce are understood at different speeds. Individual body expression and non-verbal communication via the MotionComposer open up a completely new world of experience and expression. Experiencing the MotionComposer together promises joy through participation and self-confidence for people of all abilities.

**Supporting individual needs and characteristics.** Through the interactive interplay of movement and music, the MotionComposer supports independence, motivation and communication, self-awareness, emotional and social development, cognitive and motor development, and last but not least: creativity!

**Promoting participation and inclusion.** The MotionComposer is an ideal tool for successful inclusion work. It offers a variety of user-scenarios, including movement stimulation, improvisation, musical and dance creations, storytelling, role-playing, and so on.
