

# THE MOTIONCOMPOSER

Discover new worlds with the blink of an eye!

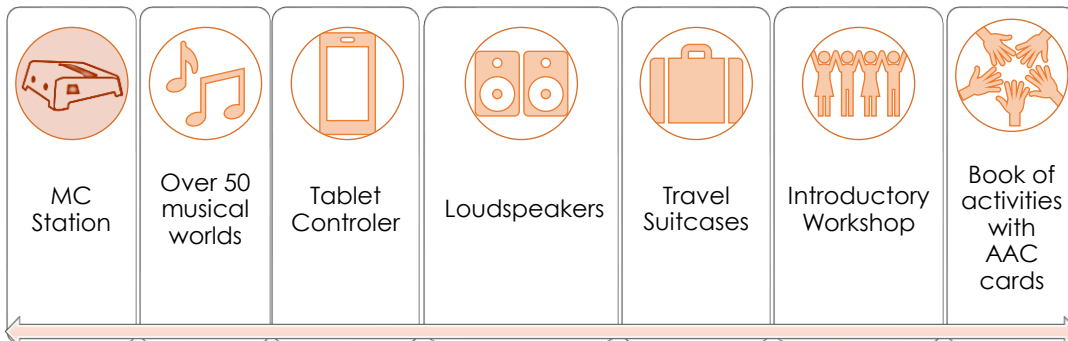

Using a 3D camera, this high-tech interactive device turns your movements into music.

Make birds chirp with just the blink of an eye? Make piano notes sound with a movement of your arm?

The MotionComposer is a pioneering accomplishment in technology for creative expression in persons with different abilities. It is ideally suited for those interested in exploring new methods in therapeutic or educational practice, and for institutions wanting to expand their creative offer to all abilities.

## The MotionComposer includes:

16.800€ (before VAT) with 3-year warranty and software-updates.

Would you like to see the MotionComposer in practice? Take a look at our workshop offers or send us your proposal for an event!

# THE MOTIONCOMPOSER

## In practice

- Tablet Interface
- Over 50 sound worlds, from classical instruments to nature, animal sounds and drums
- 5 modes of play, 1, 2 players and groups
- Accessible for all
- Mobility stimulation, gestures and coordination

When I move, I make music!

**Sharing experiences.** Music touches everyone and brings people together. The Motion Composer's interactive technology makes movements audible. Every movement, no matter how small, can produce sound effects in real time. Individual body expression with the MotionComposer opens a completely new world of experiences. Experiencing the MotionComposer together promises joy through participation and self-confidence for persons of all abilities.

**Supporting individual needs.** People with severe disabilities are often excluded from active participation. Through the interactive interplay, the MotionComposer supports self-determined expression, motivation, and communication. This technology helps to improve body/self-perception and coordination. The device can be used for therapeutic purposes, stimulating movements and mobility as well as recreational or artistic projects.

**Promoting participation and inclusion.** Whether in the frame of therapeutic purposes, recreational or artistic projects The MotionComposer is an ideal tool for successful inclusion work. It offers a variety of user-scenarios, including improvisation, musical and dance creations, storytelling, role-playing. Creativity as a driver of change!
